Date:	03/04/2014	Version:	1.0	Pages	9
Product:	All HikVision IP related Products				
Action Required:	Information only				

Because APPLE MACs are so safe, there are a lot of security features that prevent third party software installation, HikVision **iVMS-4200**.

To install iVMS-4200, first download the latest version from:

http://www.hikvision.com/en/us/download_more.asp?id=1167

After downloading, open the "**RECENT DOWNLOADS**" (it looks like an arrow pointed downwards on the top right corner of SAFARI browser)

Figure 1

After opening the "RECENT DOWNLOADS", double-click on downloaded iVMS-4200 (See Figure 2)

This is a result of APPLE security settings being set to accept APPs or Programs, only from **APPLE'S APP STORE**, or "**IDENTIFIED DEVELOPERS**". Here is a way to bypass it: Open "**System Preferences**" (the icon looks like a gear. See Figure 4)

Figure 4

After going to "System Preferences", locate and click on "SECURITY AND PRIVACY" (Figure 5).

Figure 6

The circled area shows the restrictions to install or run any APPs or Programs downloaded from any source but the **APP STORE**.

As shown, the area is "greyed out" (cannot change the values/settings). To unlock this feature, click on the **LOCK** icon on the bottom left corner.

This operation will require the computer owner's username and password. There is no default or backdoor password. This password has been set by the owner when this computer was powered for the first time(See figure 7 and Figure 8).

After entering the password, the abovementioned area (Figure 6) will become available for making changes. Check the **"ANYWHERE"** option (Figure 9).

After selecting the **"ANYWHERE"** option, a prompt will pop-up asking to **"ALLOW FROM ANYWHERE"** or to **"CANCEL"**. Select **"ALLOW FROM ANYWHERE"** (Figure 10).

After all these steps have been taken, install the software by clicking **"CONTINUE"** when prompted (Figure 11). The user may be prompted for the owner's password once again.
